In filing

Core developers based in the UK and Norway with strong expertise in Video Communication:

Signal processing:

To build audio and video codecs optimized for standard CPUs

Distributed systems:

Fully virtualized distributed systems, provide massive scalability

Infrastructure as a Service:

Leveraging latest features from cloud services¹ to optimize platform efficiency and scalability

Service operations:

Semi-automated operations based on microservices ensure high reliability and great user experience

Tested, and tested again

- We don't compromise on testing. It's been our top priority since our first line of code
- Constant verification through continuous integration and test automation.
- Automatic functional testing ensures continuous support of customers' deployments.
- Automated end-to-end and interoperability testing for future and legacy devices and infrastructure compatibility.
- Pexip customers upgrade to the latest version more quickly than others assured there are no issues that need resolving

24/7

Pexip testing suite runs 24 hours a day, every day

100k

Pexip conducts over 100,000 tests daily

300M

Pexip has run over 300 million tests in total

What customers are saying

It was important for us to have the capabilities to enable our people to communicate with our clients effectively. Given the large scale -400,000 people and over 4,000 video conferencing calls a month. Being able to bring those together is really important to us.

*David Petricca,
Global Video & Collaboration Architecture
Sr. Manager (Accenture)*

Pexip enables our organization to maintain our high standards of privacy and security. Improved efficiency and interop for all in the organization. Seamless collaboration from anywhere to anywhere.

An ecosystem of technology partnerships

Co-creating solutions with the world's leading technology companies

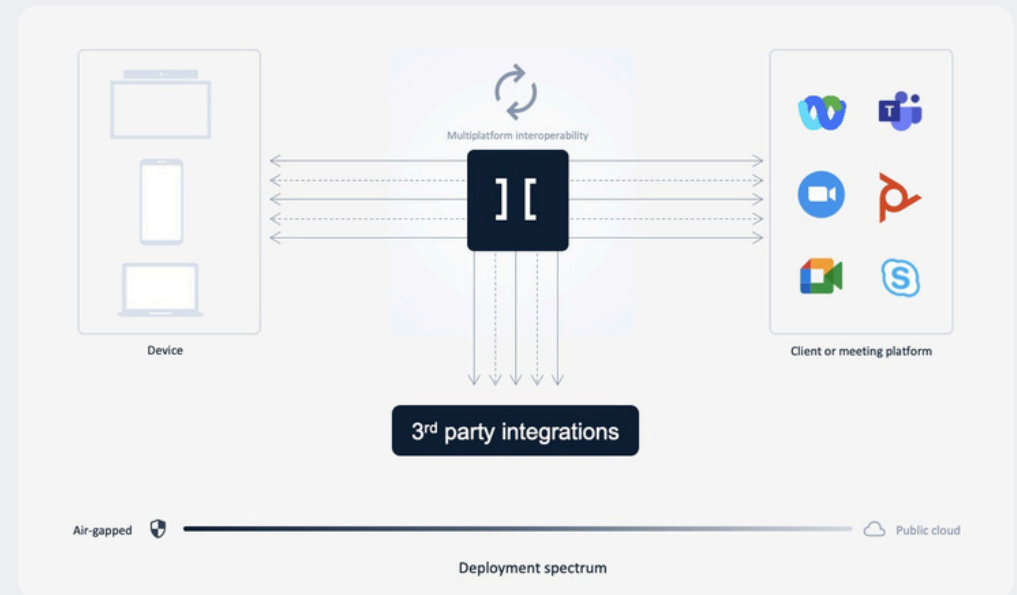

Multiplatform Meeting Interoperability

“You guys have a real advantage
–it’s the closest thing to Teams without being there”
Vice President, Microsoft Teams

Secure and Custom Virtual Meetings

Advancing a safer, greener,
more connected world.
